

Outdoor Cabinets

DESCRIPTION

Sharkcrack Outdoor Cabinets are designed for installations where increased durability and IP65 ratings are required such as harsh outdoor weather conditions and within factory environments where dust and water may be present.

FEATURES

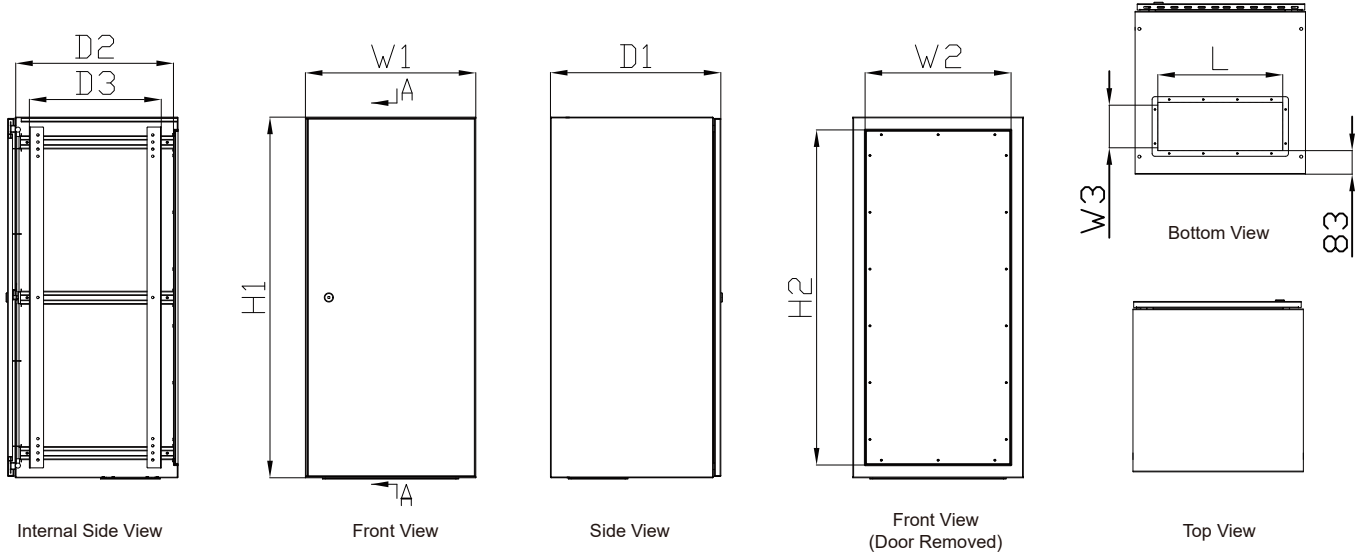

SPECIFICATIONS

- 19" cabinet installation system designed to protect sensitive equipment from harsh environments.
- Suitable for protecting equipment from dust and water.
- Designed to accommodate small to medium passive patching networks.
- Easy cabling via gland plate.
- Front or rear depth adjustable 19" rack rails.
- Manufactured from 2.0 mm electrophoresis and powder coated steel.
- Front and rear adjustable 19" rack rails.
- Gland plate (fitted internally or externally).
- 7mm square turnbuckle lock.
- Lockable L handles.
- 3-point locking.
- Removable back.
- Earth strap kit.
